

## **Curriculum Vitae**

**Masoud TEIMORY MB ChB FRCOphth**  
**Surgeon**  
**Technologist**  
**Photographer**  
**Researcher**

Consultant Ophthalmologist Worthing and Chichester  
Founder of IREIF.org  
Medical Director of VersaSuite.com  
Director of Specialisteyecentre.com

## **Background of Masoud TEIMORY**

Qualified from Bristol University in 1986 and completed his Registrar and Senior Registrar at St. George's Hospital, Croydon Eye Unit, and Moorfields Eye Hospital. Croydon Eye Unit has been a pioneering centre for modern small incision day case cataract surgery in the UK. He was fortunate to have been trained in small incision cataract surgery early in his career.

He has also completed one year fellowship in strabismus at Moorfields and a further one year fellowship in neurophthalmology at the Bascom Palmer Eye Institute, Miami, Florida. He has presented at national and international level, and has published in peer-reviewed journals in the area of cataract, corneal surgery and neuro-ophthalmology.

Having joined the West Sussex Eye Unit in 1997. He practices as an ophthalmologist with subspecialty interests in anterior segment surgery (cornea and refractive) as well as strabismus and neuro-ophthalmology. He continues to have an active research interest and his collaborative genetic studies with the University of Leeds has resulted in mapping of a gene for Dominant Optic atrophy affecting a large pedigree in West Sussex. He currently has a number of prospective studies into new lens biomaterials, in particular MI60 B&L lens.

He is one of the most innovative eye surgeons in UK and was invited at the recent World congress of ophthalmology to present on new innovations in strabismus surgery.

Masoud designed a software 1989 to audit complex outcome of cataract surgery, this later became a web savvy database using the filemaker pro. The entire process was designed by this clinician.

Masoud is now the medical director of a cutting edge EHR company known as VersaSuite. He has been responsible for leading the development of complex tools for recording disease in a paperless format. He lectures in technology as an invited guests and has presented nationally and internationally on The subject.

Masoud has a passion for education and training and has set up IREIF.org. IREIF stands for I(eye) research, education and innovation Foundation. This will a charitable organization with the aim of educating patients and Doctors alike through out the world.

Masoud has inspired many colleagues who have gone on to create cutting edge health organizations in UK, Massoud Foulday and Nigel Kirkpatrick are excellent examples.

The IREIF will act as an educational portal for patients, nurses and Doctors through out the world. There are many charitable organization that have approached masoud to take this forward. There are many synergies between apple and Masoud's vision of education.

Masoud has been an apple advocate since Apple SE days and has been instrumental in the introduction of apple computers in West Sussex Hospitals, large number of apples are purchased for education and research at Worthing and Chichester Hospitals.

**Mr Masoud Teimory**

**Consultant Ophthalmologist**

**GMC: 3119363**

Jan 1988.....Primary FRCS Edinburgh  
Nov 1990 .....Optics and Refraction Module of FRCOphth  
Mar 1991 .....Final FRCOphth  
Oct 1994.....Completed one year Neurophthalmology  
..... Fellowship Bascom Palmer Eye Institute  
Miami Florida USA

## Current Appointment

**July 97 to present: Consultant Ophthalmologist at Worthing Hospital. Soon after being appointed at Worthing and Chichester “Western Sussex Hospital Trusts”, I became the clinical tutor for ophthalmology and in a short space of time created a comprehensive teaching and education program.**

**This was followed by three year as clinical director of Head and neck and ophthalmology, I was instrumental in overseeing a major program of investment in the department, innovation and Research.**

**In a short time the department became one of the best eye departments in UK.**

## Past Appointments

**Aug 94 to Oct 1994. Vitreoretinal Senior Registrar to Mr. Leaver at Moorfields.**

An excellent opportunity to perform conventional detachment surgery as well as vitrectomies for a multitude of vitreoretinal disorders.

**Nov 94 to Feb 1994. Glaucoma Senior Registrar to Messers Peng Khaw and Michael Miller at Moorfields.**

Mr Peng Khaw has done extensive laboratory and clinical research on the use of antimetabolites for glaucoma surgery; he also manages all the pediatric glaucoma at Moorfields. This attachment provided an ideal opportunity to become experienced in the use of antimetabolites and management of congenital glaucoma.

**March 95 to June 1995. Squint Senior Registrar to Messers Peters Fells and John Lee at Moorfields.**

Mr Fells has a particular interest in restrictive myopathies, in particular thyroid eye disease. He also performs ciliary vessel sparing squint operations in high-risk squints to avoid anterior segment ischaemia. Mr Lee has a special interest in the use of botulinum toxin, especially in paralytic strabismus. This attachment provided the ideal opportunity to become experienced in the above techniques in addition to the application of adjustable suture techniques in strabismus surgery.

**July 95 to September 1995 Senior Registrar to Mr GM Thompson at St George’s Hospital:**

Mr Thompson has a special interest in Neurophthalmology and Strabismus. I participated in the running of a Neurophthalmology Clinic held weekly at the Atkinson Morley Hospital, and have a dedicated squint list at St Hellier’s Hospital every other Thursday afternoon.

**October 95 to January 1996 Senior Registrar to Mr CK Rostron at St George’s Hospital:**

Mr Rostron specializes in anterior segment surgery. I have had an wide exposure to the standard as well as the more innovative techniques of corneal surgery such as deep lamellar grafts, epikeratophakia and refractive surgery.

**February 95 to June 96. Senior Registrar to Messers IK Luke and GW Aylward at St George’s Hospital/Moorfields.**

Mr Aylward specializes in surgical as well as medical retina. I have gained further experience in the management of routine detachment surgery as well as more complex vitreoretinal cases. In the referral clinic, in addition to the surgical retina, rare and unusual medical retina cases are managed.

**July 1996 to June 97. Senior specialist registrar Strabismus and Neurophthalmology . JP LEE, GW Adams, J Sloper, Gordon Plant Moorfields Hospital**

## **Strabismus Fellowship**

July 96 to June 1997 Mr JP Lee Miss GW Adams Moorfields Eye Hospital London

I was the senior fellow at the strabismus department for a twelve months period. Moorfields attracts referral nationally and internationally and I was able to gain a sound knowledge in the medical and surgical management of patients with common and unusual strabismus. There was a dedicated weekly botulinum toxin clinic for the management of periocular and ocular conditions.

## **Neurophthalmology Fellowship**

**October 1993 to September 1994. Bascom Palmer Eye Institute Miami Florida.**

## **Other appointments**

### *Ophthalmology Registrar rotation*

**Oct 1991 to Sept 1992. St George's Hospital Tooting London.**

**Oct 1992 to Sept 1993. Mayday Hospital Croydon.**

### *Senior House Officer rotation*

**Aug 1989-Sept 1991**

SHO ophthalmology. St Paul's Eye Hospital Liverpool.

**Feb 1989** SHO Neurosurgery, Frenchay Hospital, Bristol to Messrs HB Griffith, BH Cummins,

**Sept 1988** SHO Royal United Hospital Bath to Messrs JD Griffiths, DEP Jones and PD Finlay .

**Feb 1988** SHO Accident and Emergency, Royal United Hospital Bath Dr R Snook.

**Aug 1987** I spent six months doing locum work and studied for Primary Fellowship.

**Feb 1987** House Physician, Yeovil District Hospital to Dr TG Palferman.

**Aug 1986** House Surgeon, Royal United Hospital, Bath to Mr DC Britton .

**Nov 1986** House Surgeon, Royal United Hospital, Bath to Mr P Bliss and PN Yeoman.

## **Information Technology**

I have a major interest in developing sophisticated databases for clinical and research use. This has led me to become one of very few clinicians with a high level understanding of Electronic Health Record at national and international level.

I am a regular contributor to American Academy of Ophthalmology IHE (integrated health care environment) study group, helping to develop the necessary standards for achieving seamless equipment connectivity and setting the future standards for EHRs

I have been presented at ASCRS, AAO, Nottingham, Bristol, Imperial College, Devon, Burton-on-Trent and Tehran University on the subject of Electronic Health Records over the last few years.

I am medical Director of VersaSuite.com a leading edge EHR Software.

## **Teaching, Education and Innovation**

As the clinical tutor in Worthing Hospital I attracted outside funding to purchase a comprehensive multimedia system for education and research, this set up has continued to evolve and rotating juniors assure me it is the best set up they have seen in the region for education and training.

We now have a dedicated weekly half day for teaching as well as three weekly tutorials for training and education purposes.

Involved in numerous teaching sessions for: medical students, orthotics, and nurses, General Practitioners.

Responsible for organizing the weekly half-day regional teaching at South Thames region. Involved with the American Academy of ophthalmology and ran educational courses at the academy in 1998, 1999, 2000.

Responsible for many innovations and completed research projects
